[redacted] Project X

May 2016

Description:

Project X (Un-named at this point) aims to build an Android Mobile application that acts as a market place facilitator for investors to supply capital for the loans market. [redacted] manages 2 types of purchasable loan portfolios (a) [redacted] Loan Products, (b) Direct-Borrow Loans

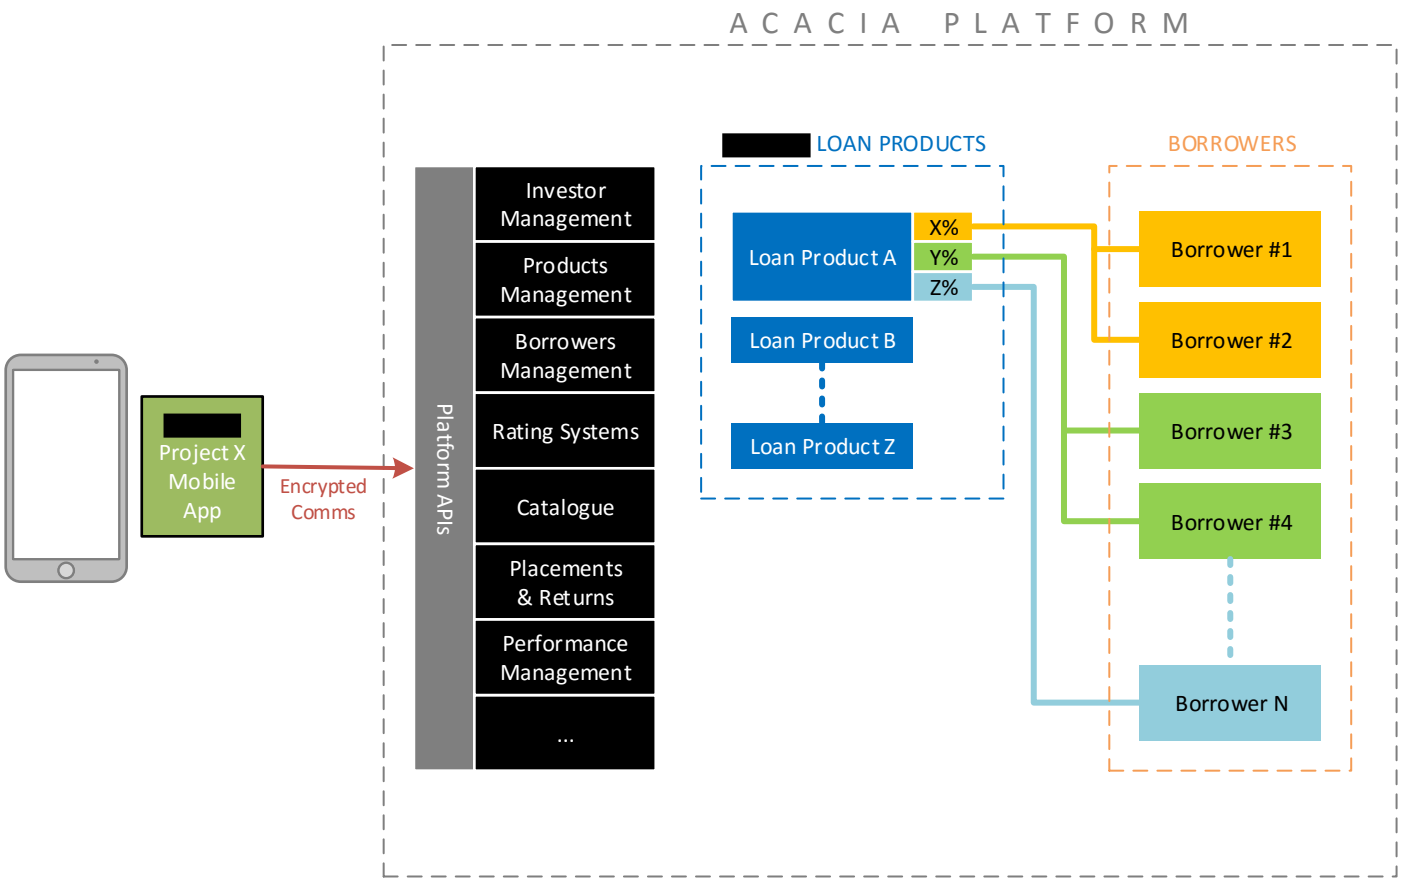

The mobile app presents the products and actual borrowers like a eBay listing, with borrowers' reliability rating, previous borrowings, feedbacks from previous backers, etc.

This enables investors to take on products (blended & lower risk) and also direct loan engagements.

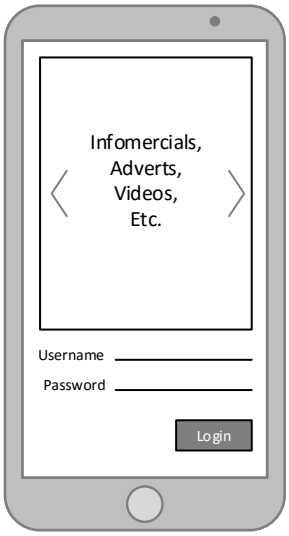

Expected Duration: **3 months**

- Requirements & Design (2 Weeks)
- Development (2 Months)
- Testing & Commissioning (2 Weeks)
